

INTRODUCTION

How to use this site...

Each section of this site is a component of the story of Kodiak and Polar Kraft high performance papers. View each one in order to get the full story on the Canfor products.

Northern Fibres provide superior strength

Canfor's Specialty Pulp and Paper manufactures Kodiak and Polar in Prince George, British Columbia from a forest resource world renowned for high strength, fine Northern Fibres. These thin cell wall fibres collapse into ribbons which bond to one another better than almost any other fibres in the world.

high fibre bonds = high paper strength

Microscope Cross Section of Paper

Southern Fibre
Coarse fibres do not collapse

Kodiak/Polar Fibre
Cell wall collapses into ribbons
providing superior bonding.
